EDUCATION

Polytechnic University of the Philippines – Manila, Philippines

Oct 2023 - July 2026

Diploma in Information Technology

President's Lister; Cumulative GWA: 1.34

EXPERIENCE

Full Stack Developer

Mar 2026 – Present

FG Aesthetic Centre

- Agile Leadership & Scrum: Directed a five-person engineering team to develop an NFC-based loyalty platform, implementing a structured Scrum cadence that increased sprint velocity and accelerated feature rollouts.
- DevOps & Infrastructure: Resolved deployment inconsistencies by architecting Dockerized CI/CD pipelines, reducing delivery cycle times and stabilizing the production environment across salon locations.
- Operational Impact: Decreased support escalations through the implementation of a role-based access control (RBAC) system, ensuring a secure and specialized software infrastructure for salon staff.
- Mentoring & Onboarding: Facilitated the technical onboarding and mentoring of team members, streamlining development workflows and ensuring 100% alignment with project management goals.

Information Technology Intern

Jul 2025 – Sep 2025

Condor POS Solutions RP Inc.

- Deployment & Configuration: Spearheaded the end-to-end deployment and configuration of Point-of-Sale (POS) systems across multiple client locations, ensuring 100% hardware-software synchronization and operational readiness.
- Infrastructure Maintenance: Executed routine IT support including the setup, preventative maintenance, and repair of desktop units and peripherals, maintaining high system availability for business-critical operations.
- Database Troubleshooting: Conducted SQL data manipulation to maintain system functionality and resolve minor database inconsistencies, directly supporting the stability of backend operations.

PROJECTS

DevDigest | AI-Powered GitHub Digest Tool

- Core Functionality: Engineered an automated system that summarizes GitHub team activity and delivers daily briefings directly to Discord, improving team transparency.
- Architecture Evolution: Evolved the platform from a simple n8n workflow into a robust, cloud-native architecture leveraging AWS Lambda, EC2, and Docker.
- Tech Stack: Developed using Next.js for the frontend and Vercel for deployment, integrating AI for intelligent activity summarization.
- Hackathon Escalation: Developed and pitched the project during a high-pressure sprint, evolving the platform from a simple n8n workflow into a robust, cloud-native architecture leveraging AWS Lambda, EC2, and Docker.

GLAM-ID | NFC-Enabled Loyalty Management Platform

- NFC Integration: Developed a full-stack web application that modernizes aesthetic clinics by utilizing NFC tags for seamless loyalty reward tracking.
- Identity Management: Built features allowing staff and customers to instantly track visit history, reward points, and membership status via mobile-responsive NFC scans.
- System Design: Focused on high-availability Web APIs and a user-centric frontend to ensure efficient data retrieval and client management.

Municipal HR Management System | Full-Stack Local Government Prototype

- Leadership & Development: Spearheaded a five-person team to drive the end-to-end development of a web platform for the Municipality of Concepción.

- Workflow Modeling: Designed and implemented core HR modules including hiring, onboarding, attendance, and performance tracking using PHP and MySQL.
- Social Impact: Aligned the design with SDG Goals to ensure viability for deployment across local Philippine municipalities.

ORGANIZATIONS

AWS Cloud Club PUP | Member)

Oct 2024 – Present

- Cloud Architecture: Explored and implemented cloud-native solutions using AWS services, focusing on scalable infrastructure and serverless computing models.
- Industry Integration: Actively participated in cloud workshops and build-a-thons to bridge academic knowledge with industry-standard DevOps practices.

Google Developer Student Clubs - PUP | Curriculum Analyst (Cloud Solutions)

Nov 2024 – Aug 2025

- Curriculum Engineering: Researched and structured 12+ cloud computing topics, focusing on GCP fundamentals and serverless architecture to standardize the learning path for 50+ participants.
- Strategic Planning: Analyzed student skill gaps to design monthly "Cloud Study Jams," resulting in higher community engagement and practical certification interest.

CERTIFICATIONS

Computer System Servicing NC II

TESDA

- Mastered the installation and configuration of computer systems including hardware assembly and software installation.
- Developed skills in setting up and configuring computer networks and maintaining overall system performance.

Visual Graphic Design (VGC) NC III

TESDA

- Acquired advanced techniques in developing visual communication solutions for print and digital media.
- Learned professional multimedia design workflows and industry-standard creative software.

Docker Essentials: A Developer Introduction

IBM

- Learned the fundamentals of containerization and how to create and manage Docker images.
- Gained practical experience in deploying and scaling containerized applications across different environments.

Introduction to Modern AI

Cisco

- Studied the core principles of Artificial Intelligence and the various types of machine learning models.
- Explored the practical applications and ethical considerations of implementing modern AI solutions.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, PHP, C, C++, SQL

Frontend: Next.js, ReactJS, Vue.js, Vite, Tailwind CSS, HTML5, CSS3

Backend: Node.js, FastAPI, Flask, REST API, n8n, OAuth, JWT

Database & Cloud: Supabase, PostgreSQL, MySQL, AWS S3, AWS Lambda, AWS CloudFormation, Amazon RDS, GCP, Azure

DevOps & Security: Docker, Kubernetes, GitHub Actions, CI/CD, Git, AES, RSA, SHA, Linux

Tools: VS Code, IntelliJ, PyCharm, Discord, Teams, Trello, Jira
